OBJECTIVE

I am a final-year Information Technology Engineering student at Mumbai University and a Platform Engineer at Riamona Luxury & Fashion Brands. I have hands-on experience building, deploying, and maintaining end-to-end automation systems, full-stack web applications, and ML-powered solutions. My technical expertise spans Python, JavaScript/TypeScript, React, Flask, and cloud infrastructure.

I am actively seeking full-time roles in full-stack development or ML engineering where I can leverage my experience in system design, API integration, and data-driven product development.

EDUCATION

Terna Engineering College, Nerul

Nov 2022 – June 2026

BE – Information Technology, Mumbai University

D.A.V. Public School, Airoli

June 2020 – July 2022

CBSE 12th Science

D.A.V. Public School, Airoli

May 2020

CBSE 10th

EXPERIENCE

Platform Engineer

Jan 2026 – Present

Riamona Luxury and Fashion Brands Pvt. Ltd.

Navi Mumbai, India

- Owning end-to-end software development across multiple internal products – architecting, building, and shipping full-stack applications using React, Node.js, Python, and PostgreSQL
- Designing and maintaining REST and GraphQL APIs, database schemas (Prisma/PostgreSQL), and integrations with third-party services
- Writing unit, integration, and end-to-end tests; enforcing code quality through reviews, linting, and automated checks before release
- Setting up and maintaining CI/CD pipelines on Railway and GitHub Actions for automated builds, tests, and zero-downtime deployments
- Managing cloud infrastructure, environment configuration, monitoring, logging, and incident response across staging and production
- Collaborating directly with stakeholders to translate requirements into technical specs, ship features, and resolve production issues

TECHNICAL SKILLS

Languages

Python, JavaScript, TypeScript, Java, HTML, CSS

ML & Data

TensorFlow, Scikit-learn, NLTK, OpenCV, Pandas, NumPy,
Deep Learning, NLP, Computer Vision

Web & Frameworks

React, Node.js, Express.js, Flask, Prisma, TailwindCSS, Vite

Databases

PostgreSQL, MySQL, MongoDB

Cloud & DevOps

Google Cloud, AWS, Docker, Railway, Git

APIs & Integration

REST APIs, GraphQL, Shopify Admin API, BeautifulSoup

CERTIFICATIONS

Generative AI Mastermind by Outskill (2025)

Google Cloud Skills Boost Arcade (2024)

Oracle Cloud Infrastructure (2023)

PROJECTS

Vehicle-to-Vehicle Communication System (Ongoing): Currently developing a simulation-based system for accident prevention and blind-turn safety through V2V communication. Implementing communication protocols, sensor data processing, and real-time alert mechanisms to enhance road safety on accident-prone highways. [GitHub](#)

Shopify Gold Price Automation System (2025): Built an end-to-end automated pricing engine for a luxury jewellery Shopify store with ~939 products and 55,000+ variants. System scrapes live gold rates from IBJA twice daily, recalculates all variant prices using a component-wise formula (gold weight $\times$ purity rate + diamond weight + making charges), and pushes updates via Shopify GraphQL Bulk Operations API with zero manual steps. Deployed on Railway with Flask, PostgreSQL, and Telegram bot notifications. *(Proprietary)*

Invoice & Payment Management Portal (2025): Engineered a full-stack enterprise financial platform for invoice tracking, payment scheduling, and UTR verification. Features a slab-based early-payment discount engine, daily interest penalty calculations, bulk Excel invoice import, role-based access (Admin, Customer, Agent, Sub-Agent, Employee), and a payment simulator. Built with React, TypeScript, Express.js, Prisma ORM, and PostgreSQL; deployed on Railway. *(Proprietary)*

Face Recognition Attendance System (May 2025): Implemented an intelligent attendance system using facial recognition to automate daily tracking. Utilized OpenCV and face-recognition libraries for real-time image processing and recognition. Integrated with MySQL for secure storage and automated attendance reports. [GitHub](#)

Fitness Tracker Application (Nov 2024): Built a responsive fitness tracking web platform featuring BMI calculator, user fitness goals, and lifestyle data logging (diet, sleep, workout). Integrated Chart.js analytics for personalized insights and progress monitoring. Designed with scalability in mind for future integration with professional health experts. [GitHub](#)

Movie Recommendation System (May 2024): Engineered a full-stack web application for personalized movie recommendations using collaborative filtering. Integrated IMDB/TMDB APIs for movie data and implemented sentiment analysis of user reviews with NLTK. Designed a responsive React front-end with Flask backend optimised for real-time recommendations. [GitHub](#)

LEADERSHIP / EXTRA-CURRICULAR ACTIVITIES

- **Computer Society of India, Terna Chapter – Vice Chairperson**

Led the CSI student chapter in organising technical events, workshops, and seminars. Managed 40+ members to ensure smooth operations, built strategic initiatives for student engagement, and promoted technical growth on campus.

- **Training & Placement Cell – Deputy Secretary**

Coordinated with HR professionals and industry experts to strengthen campus-industry relations. Oversaw placement readiness initiatives, facilitated communication between students and recruiters, and contributed to smooth execution of placement activities.

- **Revive Cultural Fest, TPCT – Hospitality HOD**

Directed hospitality operations for one of the largest cultural fests on campus. Managed high-profile guests and celebrity judges, coordinated a team of volunteers, and ensured seamless experience for 1,000+ participants.

- **Finalist – Avishkar Research Project Competition 2025, Mumbai University**

Selected as a finalist in Avishkar 2025, one of the most prestigious inter-collegiate research competitions organised by Mumbai University, competing among hundreds of student teams across disciplines. Presented original research demonstrating strong analytical thinking, problem-solving ability, and structured technical communication. Recognition reflects commitment to innovation and academic excellence beyond regular coursework.
